EasySens® – ROOM OPERATING UNIT

The Technical Design-Highlight «

SR06 LCD

Stylish, compact, user-optimized – the new Thermokon room operating unit SR06 LCD enables a comfortable control of the room climate. Besides current values the display allows the precise input of desired set points and the control of lights and blinds (optional).

Flexibility is rated very highly even with regard to installation and maintenance. The solar-cell powered room operating panel is energy self-powered and maintenance-free. In addition, the SR06 LCD is wireless – no wiring needed. Thereby, a free room positioning is no problem.

Thanks to EnOcean based RF technology the communication with the building technology is made automatically without your assistance.

ADVANTAGES.

- » Modern, high-graded optics
- » Compatible with products from EasySens®-Series
- » Best possible flexibility thanks to different types available to control fan stages, lights, blinds and occupancy
- » Bidirectionality by means of SmartACKNOWLEDGE
- » Battery-less operation due to Energy Harvesting Technology
- » Compatible to all common switch programmes – three colors at option
- » Visualisation of various values via LCD

TECHNICAL HIGHLIGHTS.

- » Energy self-powered thanks to Energy Harvesting Technology
- » Indication of current values and set values as well as room occupancy via integrated display
- » Adjustment of room temperature via function buttons
- » Integrated temperature and humidity sensor (optional)
- » Easy configuration via PC
- » Powerful energy storage
- » Feasibility of guaranteeing a balanced energy balance
- » Possibility to configure device settings via software
